'National Deworming Campaign' 2024 Classes VI-XII

SPS/ 667 /2024

11th November, 2024

Dear Parent

The second round of National Deworming Campaign, under the guidance of the Directorate of Family Welfare, GNCTD, is scheduled to take place throughout India from 18th to 23rd November, 2024. The campaign involves the administration of a single, age-appropriate dose of Albendazole to all children & adolescents in the age group of 1-19 years.

Infection with worms is known to cause a high rate of anaemia in children between the ages of 6 months and 59 months, followed by a similar prevalence in adolescent girls and boys, resulting in significant consequences in terms of reduced cognitive and physical development. Following directions provided by the Ministry of Health & Directorate of Education, a deworming drive (**distribution of tablets**) will be conducted at the school on 23rd November, 2024. A single age-appropriate dose of Albendazole (chewable tablets), made available by the Government **free of cost**, will be available at the school, for collection by the parent, as per the schedule shared below for collection by the parent to facilitate its administration.

Class	Date & Time	Venue
VI-XII	23rd November,2024 11:00 a.m. -12:00 noon	Counter at Gate No. 2

Parents are requested to collect the tablet for administering to their ward.

Regards

Priyanka Barara
Principal
