Subject: Important Digital Safety Advisory for Parents

Classes VI-VIII

SPS/774 /2025

9 December 2025

Dear Parents

This is an important reminder regarding a growing digital trend among students involving increased engagement with popular online games such as Roblox, Minecraft, and other similar multiplayer platforms. What may begin as entertainment is quickly turning into a strong social trend, influencing children to spend long hours gaming and discussing these platforms extensively.

While these games appear creative and harmless on the surface, global reports have highlighted several serious risks:

- Roblox has been associated with unsafe interactions, where strangers posing as children attempt to seek personal information or initiate inappropriate conversations.
- Even widely trusted games like Minecraft, when played online, expose children to unregulated chat features, unknown players, and addictive gameplay patterns.
- Extended use of such platforms impacts students' focus, emotional balance, and overall cognitive well-being, especially when school-time discussions reinforce the habit.

To ensure a safe digital environment for our children, we request parents to:

1. Monitor your child's screen time and the games they access.
2. Discourage or restrict access to unsafe online multiplayer platforms.
3. Discuss online safety and the dangers of interacting with strangers.
4. Promote healthy, balanced routines with adequate offline activities.

We appreciate your cooperation in nurturing a safe, responsible, and well-balanced digital environment for our students.

Regards

Priyanka Barara
Principal
