

SUSTAINABILITY CHAMPIONS: HARBINGERS OF CHANGE

With the aim to nurture responsible, well-informed, and conscious global citizens, the educational landscape at Salwan Public School extends beyond the academic horizons. By thoughtfully integrating the vision of the United Nations Sustainable Development Goals (SDGs) into everyday learning, the students are equipped to take meaningful action for a sustainable future. The Salwanians are ready to lead the sustainability revolution through trailblazing initiatives, well-structured SDG activities, innovative projects and community outreach events organized throughout the year. Invigorating activities such as role plays, assemblies, poster making, model construction, science exhibitions, campaigns and hands-on tasks conducted throughout the academic session fostered environmental awareness, creativity and collaboration, empowering young learners with essential 21st Century skills such as critical thinking, innovation and problem-solving skills. The sustainability superheroes were inspired to create a cleaner, greener and sustainable future.
